REVIEW

CODE REVIEW 5

HISTORY

▼ sql.txt 5

1 1- Where are my customers located?

AWESOME

Correct use of a subquery! 👍

2 select count(Customers.Country) AS "Number of Customers", Customers.Country from Customers

AWESOME

Good job on using an aggregation here! 👍

3 2- What companies supply the majority of the products I sell?

4 select count(Products.SupplierID) AS "Number of Products", Suppliers.CompanyName from Product

5

AWESOME

Good job on using a JOIN statement here! 👍

6 3- Who are my highest performing employees?

7 select count(Orders.EmployeeID) AS "Number of Sale", (Employees.LastName || ", " || Employees.Fi

8

9

AWESOME

Nice work when making a relationship between two or more tables! 👍

10 4- What products are growing in terms of sales?

11 select count(OrderDetails.ProductID) AS "Number of Sale", Products.ProductName from OrderDeta

12

13

14

AWESOME

All queries were executed correctly, without any syntax errors! 👍
